RED AT THE HEART OF PERFORMANCE

About RED

RED Lubricants is a major independent lubricants brand in Australia producing premium oil, specialty fluids and greases that meet the latest OEM global standards. The company was formed by industry professionals and produces all products at a modern ISO 9001:2008 certified lubricant blending plant. Our lubricants are produced using highly refined feed stocks and carefully selected additives, resulting in top quality finished products.

Australia runs on RED.

The RED Way

The foundation of our company is built on our values, which are underpinned by the RED way. We choose to operate in a Reliable, Ethical and Dedicated way. Our vision is to inspire innovation within a changing environment, support the growth of people we engage with and respond to the core needs of the communities we operate within.

R – Reliable
E – Ethical
D – Dedicated

RED's Solution

RED Lubricants' team consists of mining and industrial lubricants professionals with a combined experience of over 100 years in the industry. Using our talent, market knowledge and unique expertise, customers can leverage our team to optimise their businesses through our value-added services which includes:

- Quality products supported by research and technical expertise
- Pricing solutions
- Security of supply
- Customer operations support
- Technical services
- Strong counterparty strength

RED Product Lineup

RED offers a full range of lubricants including specialty coolants and fluids. Our products meet or exceed the performance requirements of key global OEMs. Every lubricant we offer is backed by ISO accreditation. If you want outstanding performance, you want RED technology.

RED Lubricants provide a custom product blending service for any lubricant and specialty fluid to suit your requirements. Please contact your local RED representative for further information.
